EDUCATION

The University of Central Florida (UCF)

Bachelor of Science in Computer Science

Orlando, FL

Aug 2023 – May 2027

EXPERIENCE

Freelance Software Engineer

May 2026 – August 2026

Self Employed

Remote

- Engineered and deployed a full-stack commercial application using React/Next.js, Tailwind CSS, and Supabase.
- Architected SQL databases with Row Level Security policies and RESTful APIs for role-based access control.
- Partnered with enterprise stakeholders to translate business requirements into technical system specifications

Undergraduate Teaching Assistant

April 2025 – Present

University of Central Florida, Department of Computer Science

Orlando, FL

- Mentored over 200 students a semester in Object Oriented Programming, Data Structures and Algorithms, using C and Java resulting in increased student exam course grades by 10 points.
- Designed student extra work materials, lab and review sessions alongside other teaching assistants to increase their understanding of the course topics outside of the lecture, which increased student engagement by 50%.

Software Engineer Intern

May 2024 – August 2024

Dimelco S.A.S

Cucuta, Colombia

- Developed prototype landing page and employee system across multiple cross-functional teams using TypeScript, HTML, CSS, React, reducing single employee management time by 20 mins.
- Engineered Python RESTful APIs and SQL queries, validating them for production through GitHub Actions CI/CD pipelines and Docker Containers in an AWS environment for resulting in faster code shipping by 10%
- Mentored by senior engineers through weekly sessions for the process of documenting and implementing LLM and agentic AI-assisted work for daily tasks while receiving feedback on my personal work being reported.

PROJECTS

See Me Safe | *C++, React, Python, TypeScript, Google ADK, Gemini LLM*

April 2026

- Developed a hardware-software environment for elder people using React, TypeScript, Python and embedded C++ with the goal of taking care of disabilities, danger scenarios and overall wellness.
- Architected an application video data pipeline using Python Flask RESTful APIs, to store recorded footage on a PostgreSQL database after getting processed by Gemini LLM for more video details.

Hermes | *React, TypeScript, Python, Flask, Google ADK, Gemini LLM*

March 2026

- Built an hurricane simulation and testing platform for Tampa Bay, FL using React, JavaScript, HTML, CSS to test AI capabilities in evacuation procedures withing a team of 3 people.
- Engineered and AI agent to agent orchestration using Gemini LLM through Python, Flask, and Google ADK with the task of saving as many civilians from simulated custom hurricane scenarios.
- Developed more than 100+ AI agents to simulate the civilians for the cities, acting with their own behaviors and receiving instructions from agentic orchestration through RESTful APIs.

KnightLife | *React, TypeScript, Python, Flask, BeautifulSoup, PostgreSQL, Gemini LLM*

March 2026

- Built an ecosystem platform for all Registered Social Organizations (RSO) at UCF using React, TypeScript, HTML, CSS resulting in positive peer student and RSO feedback
- Engineered a daily scraping pipeline for Instagram and Facebook, using Python BeautifulSoup, Saving the RSO's event and information data through RESTful APIs on a SQL Database.
- Attended Biweekly tracking sessions with project stakeholders to receive direction and feedback in the process of developing our app, resulting in more efficient team merging code processes with LLM agents assisted code

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, SQL, NoSQL, HTML, CSS, R

Frameworks: React, Vite.js, Node.js, Flask, FastAPI, Next.js, PyTorch, NumPy, Scikit-learn, Pandas, Matplotlib

Databases & DevOps: MySQL, PostgreSQL, MongoDB, Supabase, Git, CI/CD, Docker, KUbernetes, AWS, Vercel
