Oviedo, FL 32765 | Bilingual in English and Spanish | xaviersotobaron.com

Education

The University of Central Florida (UCF) — Orlando, FL
Bachelor of Science in Computer Science — *Aug 2023 – May 2027*

Experience

Freelancer — May 2026 – Present
Software Engineer — *Remote*

- Developed and shipped full-stack commercial applications using React, TypeScript, JavaScript, and Python, increasing client brand exposure by 10% through production-ready software.
- Architected PostgreSQL databases and RESTful API integrations with Row Level Security policies, delivering maintainable backend solutions and secure self-service application management for clients.
- Gathered client requirements and translated business needs into production features through rapid prototyping, stakeholder feedback, testing, and deployment using Docker, AWS Lambda, Git, and GitHub CI/CD.

Dimelco S.A.S — May 2024 – August 2024
Software Engineer Intern — *Cucuta, Colombia*

- Developed and shipped full-stack employee system and landing pages across cross-functional teams using TypeScript, JavaScript, HTML, CSS, and React, which reduced employee management time by 20 minutes.
- Engineered Python RESTful APIs and SQL queries, testing and validating software through GitHub Actions CI/CD and Docker on AWS, accelerating code delivery by 10%.
- Debugged cloud deployment issues of AWS Lambda Functions using AWS CloudWatch s and documentation while incorporating technical feedback through weekly code reviews and documenting software changes.

Projects

See Me Safe | *C++, React, Python, TypeScript, Google ADK, Gemini LLM* — April 2026

- Built an end-to-end hardware-software application using C++, Python, React, and TypeScript within a group of 4 in a 24-hour hackathon, to provide care and assistance to elder people with disabilities.
- Architected a Python data pipeline and RESTful APIs to process real-time sensor and video data, integrating backend services with a React and TypeScript user interface of the user's action and daily activities.

KnightLife | *React, TypeScript, Python, Flask, REST APIs, PostgreSQL* — Jan 2026 – April 2026

- Built a full-stack application for UCF Registered Student Organizations using React, TypeScript, Python, and Flask, iterating on features through feedback from students and organization stakeholders.
- Engineered a daily data pipeline and RESTful API integration using Python, BeautifulSoup, and PostgreSQL to collect, process, and store organization event information.
- Collaborated with stakeholders through biweekly product reviews, incorporating requirements, debugging application issues, and integrating technical feedback into new features.

Hermes | *React, TypeScript, Python, Flask, Google ADK, Gemini LLM* — March 2026

- Built a full-stack hurricane simulation and testing platform within a team of 3 using React, TypeScript, Python, and Flask to evaluate AI-assisted evacuation procedures to hurricane scenarios in the Tampa Bay Area.
- Engineered backend application logic and AI agent orchestration using Python, Flask, Gemini LLM, and Google ADK to coordinate autonomous decisions across simulated disaster scenarios.
- Developed 100+ autonomous AI agents with individual behaviors for real time civilian simulation, which integrated application data and agent instructions through RESTful APIs for large-scale scenario testing.

Leadership & Activities

University of Central Florida | *Undergraduate Learning Assistant (Orlando, FL)* — April 2025 – Present

- Mentored over 200 students per semester in Calculus I, Object Oriented Programming, Data Structures, and Algorithms using C and Java, a contributing to a 10-point increase in student exam grades.

Technical Skills

Languages: Java, Python, TypeScript, JavaScript, SQL, C++, C, NoSQL, HTML, CSS, R
Frameworks: React, Node.js, Flask, FastAPI, REST APIs, Google ADK, PyTorch, NumPy, Scikit-learn, Pandas
Cloud, Databases & Tools: Git, GitHub, GitHub Actions, CI/CD, AWS, Docker, PostgreSQL, MySQL, MongoDB
